

# Safety, Health and Environmental Policy

Our everyday commitment as the World Food Company is to provide our consumers with superior quality food while respecting environmental sustainability and preserving the health and safety of our employees.

We at Nestlé recognise our responsibility and are committed to being a leader in environmental, health and safety performance among our peers in the food industry.

To fulfil this commitment, Nestlé:

- Complies with national legislation and international recommendations as a minimum standard.
- Continuously improves environmental performance through the Nestlé Environmental Management System.
- Sets and regularly monitors measurable environmental objectives in areas such as saving energy and water, reducing waste water, greenhouse gases emissions and packaging waste.
- Creates a safe and healthy working environment for each employee.
- Promotes and encourages a culture where environmental protection, occupational health protection and safety is fully incorporated in our business practices and work activities.
- Provides adequate environmental, health and safety information, communication and training to internal and, as appropriate, external stakeholders.

We encourage all our employees and suppliers to be active participants in good environmental, health and safety practices. We believe it enables us to contribute to sustainable development without compromising the ability of future generations to meet their needs.

Peter Svensson  
*General Manager*
